VOL. 91, NOS. 1–2

11 MAY 1998

Statistical treatment of the PAR variability and its application to willow coppice J. Ross, M. Sulev and P. Saarelaid	1
Statistical description of the architecture of a fast growing willow coppice J. Ross and V. Ross	23
On micrometeorological observations of surface-air exchange over tall vegetation X. Lee	39
Comparison of climate change scenario construction methodologies for impact assessment studies T. Mavromatis and P.D. Jones	51
Measurements of branch area and adjusting leaf area index indirect measurements C.J. Kucharik, J.M. Norman and S.T. Gower	69
A two-leaf model for canopy conductance, photosynthesis and partitioning of available energy I: Model description and comparison with a multi-layered model Y.-P. Wang and R. Leuning	89
A two-leaf model for canopy conductance, photosynthesis and partitioning of available energy. II. Comparison with measurements R. Leuning, F.X. Dunin and Y.-P. Wang	113
Measurements of leaf orientation, light distribution and sunlit leaf area in a boreal aspen forest C.J. Kucharik, J. M. Norman and S.T. Gower	127

VOL. 91, NOS. 3–4

1 JUNE 1998

Measurement of forest canopy structure with a laser plane range-finding method – development of a measurement system and applications to real forests T. Tanaka, J. Yamaguchi and Y. Takeda	149
Measured and predicted air temperatures at basin to regional scales in the southern Appalachian mountains P.V. Bolstad, L. Swift, F. Collins and J. Régnière	161
Diurnal hystereses of stomatal and bulk surface conductances in relation to vapor pressure deficit in a cool-temperate wetland K. Takagi, T. Tsuboya and H. Takahashi	177
Comparison of methods for estimating actual evapotranspiration in a row-cropped vineyard W. Trambouze, P. Bertuzzi and M. Voltz	193
Data error effects on net radiation and evapotranspiration estimation M.C. Llasat and R.L. Snyder	209
Modelling minimum air temperature in partially and clear felled forests K. Blennow	223
Modelling evapotranspiration from a barley field over the growing season T. Tourula and M. Heikinheimo	237
Simulating the optimal growing season of rice in the Yangtze River Valley and its adjacent area, China Y. Huang, L. Gao, Z. Jin and H. Chen	251
Predicting regional grain sorghum production in Australia using spatial data and crop simulation modelling W.D. Rosenthal, G.L. Hammer and D. Butler	263

Measurement and modelling of rainfall interception by three semi-arid canopies F. Domingo, G. Sánchez, M.J. Moro, A.J. Brenner and J. Puigdefábregas	275
Estimation of solar radiation for use in crop modelling L.A. Hunt, L. Kuchar and C.J. Swanton	293
<i>Contents of Volume 91, 1998</i>	301
